Click on **Setup** under the heading “Read & Write 11.5 for PC Users.” If an alert bar appears at the bottom of your browser, click the **Save** button.

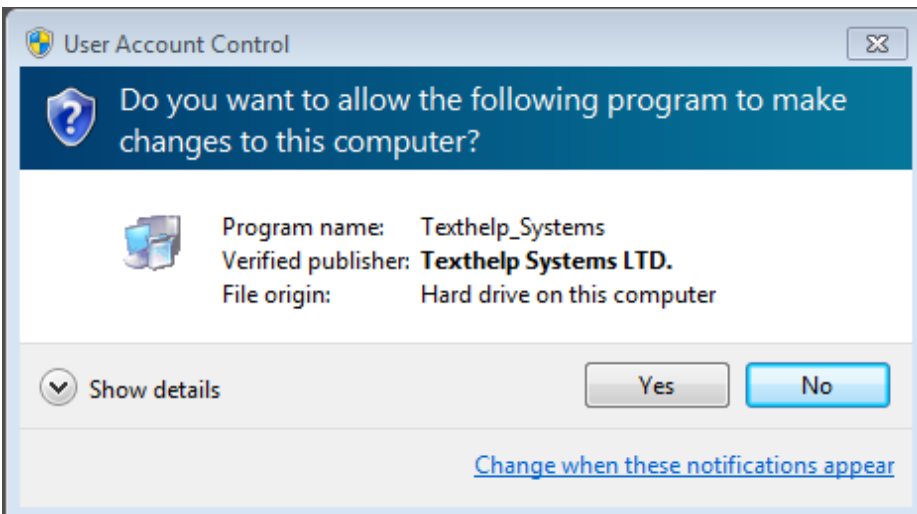

You may also have an option to open the file. Instead, click **Open folder** to open the location where the file is saved. If you do not see this bar, go to the location where you downloaded the file.

Right click on the Setup.zip and choose **Extract all**.

This will extract the files into a folder called Setup. Inside that folder, click on **Setup.exe** to start the install process. When you see the following dialog box, click **Yes**.

Read & Write will finish the installation automatically. It may take several minutes. After setup is complete, you will need to activate your copy of Read&Write. Before proceeding, make sure you have an active internet connection.

To activate Read&Write, you must first open the program by locating the icon shown above on your desktop and double clicking it. Once you double click the icon, you should be prompted by the following screen.

A screenshot of the Read&Write Activation dialog box. The title bar reads 'Read&Write Activation'. The dialog box has a tab labeled 'Home User'. Below the tab, it says 'Please enter your Activation details below'. There are two text input fields: 'Serial Number' with the value '372302-1228-7734-7755' and 'Activation Code' which is empty. Below the 'Activation Code' field is a checkbox labeled 'Activation by telephone' which is unchecked. At the bottom of the dialog box are two buttons: 'Activate' and 'Skip Activation'.

Leave the Activation Code field blank. Simply click the **Activate** button. After a few moments, you should see a dialog box that says "Activation Successful." Once complete, the program will open and you will be ready to use Read&Write.

Enjoy your new product!
